Environmental Policy

MCN is committed to protecting the environment, conserving natural resources, preventing pollution. Our goal is to reduce the impact of our operations and to be a leader in environmental responsibility

We accomplish this through policies and procedures that will ensure the reduction of our consumption of natural resources, energy and materials while minimising any adverse environmental impact from our operations, including, but not limited to, waste reduction and recycling.

We will ensure that we comply with applicable local, regional and government regulatory requirements.

We will set targets and objectives ensuring they are being met and that we continually strive to improve our environmental performance.

All employees are made aware of this environment policy and will receive relevant training to ensure they fully understand their responsibilities for environmental issues.

The company operates an energy conservation policy to ensure that all non-critical equipment is switched off when not needed and low energy electrical equipment will be preferred for purchase.

We will endeavour to perform business electronically, to reduce paper usage and use recycled paper whenever we can. Waste paper is collected and transported to the local Council's recycling area and whenever possible, we reuse incoming packaging materials.

We will always seek to purchase products that are environmentally friendly, re-usable, recyclable local and that do not damage the environment.

We will always seek to offset the carbon created by flights taken for business purposes and will endeavour to minimise business travel through the use of video conference and webinar facilities.
